49th Annual Topics in Infection

26 January 2024, 9am - 6.30pm (GMT) | Royal College of Pathologists, 6 Alie Street, London, E1 8QT

Exhibitor and Sponsor Prospectus
Dear colleague,

We would like to welcome you to exhibit and sponsor the forthcoming 49th Annual Topics in Infection conference.

The Royal Society of Tropical Medicine and Hygiene (RSTMH) is pleased to be hosting our 49th Annual Topics in Infection meeting at the Royal College of Pathologists, in London on Friday 26th January 2024. Having run since 1974, this is an established event in the infection and global health calendars and is delivered as a partnership with Barts Health and the UK Health Security Agency.

Topics in Infection is a one-day meeting focuses on emerging and topical infections, that affect those in the UK or more globally. The meeting will feature a number of high-profile speakers, including Professor Sir Brian Greenwood, and Professor Diane Ashiru-Oredope. Themes will be diverse, from talks on childhood vaccines, to tick-borne encephalitis, to AI in prevention and detection of infection.

The meeting provides an important and valuable opportunity for UK clinicians, public health professionals and researchers to come together and talk about some of the most challenging areas in infection in the UK.

The conference will attract approximately 150 delegates, mostly from the UK and from a range of sectors. A programme is available within this document and this conference has been approved for 7 CPD credits by the Royal College of Pathologists.

We are keen to welcome exhibitors this year and have arranged that all exhibits will be located in high visibility positions throughout this space, close to where refreshments are served.

I hope you will decide to partner with us for this event and look forward to hearing from you.

Best wishes,

Tamar Ghosh
Chief Executive, RSTMH
Delegate Profile

Delegates will include:
- Consultants
- Directors
- Fellows
- Lab Technicians
- Lecturers
- Managers
- Microbiologists
- Nurses
- Physicians
- Registrars
- Senior researchers
- Scientists
- Specialists
- Students
- Surgeons

with roles in:
- Biomedical research
- Communicable diseases
- Epidemiology
- Global Health
- Immunology
- Infection control
- Infectious disease
- Medical microbiology
- Microbiology
- Neglected Tropical Diseases
- Paediatrics
- Parasitology
- Public health
- Tropical medicine
- UK healthcare
- Veterinary science
- Virology
